

## THE OPTIMUM SOLUTION: SELF-TINTING SUNLENSES FROM RODENSTOCK

The intelligent sunglasses with self-tinting ColorMatic IQ® Sun 2 lenses not only provide an attractive appearance, they also offer perfect vision thanks to unique advantages:

- Intelligent sun protection with self-tinting ColorMatic IQ® Sun 2 sunlenses with a base tint of 40-55% and a maximum darkening of 90%.
- 100% UV 400 protection and ideal glare protection in any intensity of the sun.
- Robust and long lifetime - sunlenses you can rely on.
- The new SunProtect by Rodenstock prescription sunglass collection offers you the right model for every demand - thanks to a large variety of designs, a high number of tints and high-quality materials.
- All intelligent sunglasses are also available in individual prescription.

ColorMatic IQ® Sun 2: a medium tint for the best possible vision in the shade or towards evening.

Automatic darkening in the sun for full glare protection.

# ColorMatic IQ® Sun 2 – THE INTELLIGENT SUNGLASSES.

Good news for your eyes: Now you only need one pair of sunglasses for any intensity of the sun - thanks to the self-tinting ColorMatic IQ® Sun 2 sunlenses from Rodenstock. These sunlenses protect your eyes with a dark tint in strong sunlight. In contrast, in the shade the lenses lighten up to 40% and provide high-contrast vision.

The intelligent ColorMatic IQ® Sun 2 lenses are available in six trendy colours: Three fashion tints, ideal for trendsetters and the fashion-aware; and three Contrast tints, perfect for sports enthusiasts and outdoor fans.

Fashion Brown

1

### A stylish casual look:

Whether sunbathing or in the shade - the intelligent sunglasses provide optimum UV and glare protection at all times. Trendy tints, with the option of a mirror coating, complete the stylish look.

2

### Perfect for driving:

The intelligent sunglasses are the ideal companion when driving during the day. The windscreen filters most of the UV rays which are needed to tint the lenses. This means that the lenses do not darken behind the windscreen and are therefore clear enough to ensure perfect vision even when driving on shady roads. However, the lenses are simultaneously dark enough to provide optimum protection from glare for the eyes. Therefore it is not necessary to change or remove glasses while driving.

3

### Optimum sports performance:

The ColorMatic IQ® Sun 2 Contrast tints are the perfect solution for all sports. Their contrast-enhancing effect also allows fine details to be recognised during sports. Whether in the shade or in the sun, the self-tinting ColorMatic IQ® Sun 2 sunlenses offer perfect vision.
