RODENSTOCK COMPUTER LENSES.

Lenses designed for computer and other close work.

DO YOU OFTEN FEEL TENSION AT WORK? IT'S NOT NECESSARILY JOB-RELATED.

Headaches, neck tension, red or burning eyes – all typical complaints of people who spend long periods of time in front of a computer. Besides incorrect posture, incorrect lenses are often the cause of these types of problems.

At work, your eyes are constantly moving between the monitor, desktop, and co-workers. With the wrong lenses, this can be tiring as you unconsciously assume an unnatural position to keep everything focused, resulting in neck pain and headaches. The solution is Ergo® computer lenses.

Progressive lenses: Progressive lenses provide continuous, uninterrupted vision from near to far. However, the field of vision for reading and intermediate distances (document, keyboard, monitor) is relatively narrow.

ERGO® COMPUTER LENSES - COMFORTABLE VISION AT WORK AND PLAY.

Fully customised
Ergo® computer lenses from Rodenstock are the only lenses on the market that can be individually tailored to your specific needs – to your typical shifts in focus and working distances.

Totally relaxed
The large field of vision permits comfortable, fatigue-free sight and an ergonomically correct head and body position.

Easily tolerated
Your eyes adjust to Ergo® computer lenses within a matter of minutes.

Computer lenses: The perfect complement: computer spectacles with Ergo® near vision lenses. They provide an extra-wide field of vision for both near and intermediate distances, resulting in a relaxed, ergonomic work experience.

ALSO PERFECTLY SUITED FOR HOBBIES AND OTHER RECREATIONAL ACTIVITIES.

In the home, computer lenses are also the ideal complement to progressive lenses and often a better choice than reading glasses.

For reading, DIY projects, handicrafts, painting, reading music, playing board games, gardening, housework, cooking, etc.
